

# Center for RNA Therapeutics

## at Houston Methodist

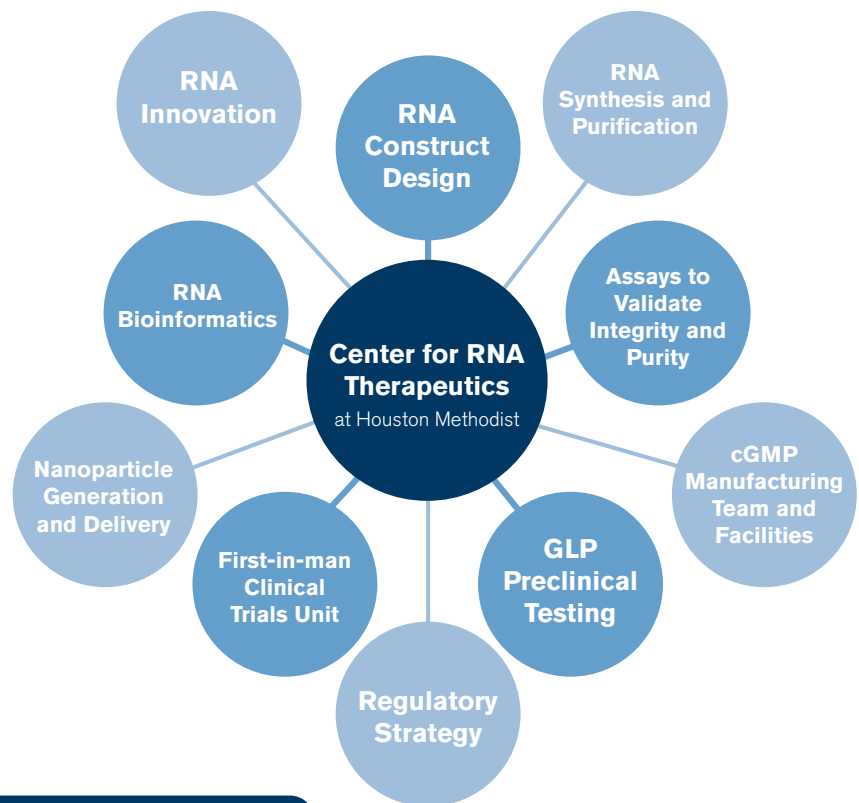

Houston Methodist Research Institute in the Texas Medical Center

### Our core competencies include:

- RNA Biology and Innovation
- Proprietary processes for synthesis, purification and validation
- Clean rooms and highly trained cGMP specialists
- GLP-compliant QC laboratory
- Experience in large animal GLP studies
- Regulatory guidance
- Nanomedicine and RNA Delivery expertise
- First-in-man unit, and large hospital system for later stage clinical trials
- CMO partner for large-batch manufacturing

### Your partner in developing RNA therapeutics:

- Providing guidance for construct development
- Generating mRNA and lncRNA for research and clinical use
- Developing delivery strategies for your RNA
- Performing preclinical testing and validation
- Supporting large animal testing and first-in-man facilities
- Scaling production to meet your needs

Our program has been continuously supported by Cancer Prevention and Research Institute of Texas since 2015. Houston Methodist is the No. 1 hospital in Texas and among the top 20 hospitals in the nation.
